6.6 Verifica

Prima della fase di rilascio definitiva del software i team che lavorano in sicurezza effettuano un'ulteriore verifica del codice elaborato mediante test di sicurezza. I test di sicurezza mirano a controllare la vulnerabilità delle superficie di attacco, in modo da agire in via preventiva alla correzione di eventuali problemi che potrebbero verificarsi in fase di rilascio.

6.6.1 Software Verification Tools

Il CATALOGO SECURITY TOOLS 6.9 raccoglie i tool disponibili, divisi per fase del processo SSDLC, che offrono funzionalità applicabili in ambito secure application development.
